PROJECT

Online Juice Ordering Application System

Project Overview :

This project is an online system that enables users to order products .

The system is built using Module Pool programming, which provides a user-friendly interface for customers to place orders and for admins to manage. The project has one ALV report and one Smartform, which are used to display and print order information.
Technologies Used :

- Module Pool
- ALV Report
- SAP NetWeaver ABAP Application Server
- Smartform
